CDDC	A Credit Derivatives Determinations Committee established by ISDA (or any successor thereto), further information on the committee, its members and its rules is available at the following website: http://dc.isda.org/	Event Determination Date	The date on which the CDDC is asked to determine whether the relevant Credit Event has occurred or, the date on which the product Calculation Agent notifies the Issuer that a Credit Event has occurred.
Credit Observation Period End Date	20 December 2032	ISDA	"International Swaps and Derivatives Association", a private trade organisation consisting of financial institutions and other derivatives market participants.
Recovery Rate	A percentage, determined in respect of one or more obligations of the Reference Entity, in an auction procedure organised by the CDDC after determination of a Credit Event (or if an auction does not happen, by the Calculation Agent seeking dealer quotations to determine the price of selected obligations of the Reference Entity that will be used as Recovery Rate).	Credit Event Backstop Date	30 October 2032

The Securities will be redeemed on the Redemption Date by a payment in cash in respect of each Certificate equal to the Notional Amount provided that no Event Determination Date has occurred with respect to the Reference Entity. The occurrence of an Event Determination Date will be determined by the CDDC or by BNP Paribas as Calculation Agent, following the occurrence of any one of the following events (each a "Credit Event"):

- Bankruptcy: the Reference Entity experiences bankruptcy or liquidation or insolvency or related events.
- Failure to Pay: the Reference Entity fails to make payments to creditors due on its debt at all or in good time.
- Restructuring: the Reference Entity's debt is restructured on terms that are detrimental to the holder(s) of the relevant debt in a form that is binding on all holder(s).
- Governmental Intervention: A governmental authority announces a devaluation or a disadvantageous modification of the terms of the Reference Entity's debt, under applicable law in cases such as restructuring and resolution.

Only Credit Events occurring between the Credit Event Backstop Date and the Credit Observation Period End Date (or a later date in some circumstances) shall affect the product (earlier or later Credit Events shall not be taken into account).

If a Credit Event occurs with respect to the Reference Entity of the product, the outstanding Current Notional Amount will be reduced to zero and, the product will redeem early and in full at a Current Notional Amount per certificate of zero on the Redemption Date following a Credit Event following the determination of the latest Recovery Rate. In such case, the investor will suffer a loss of up to 100% of the Notional Amount per certificate (the loss being 100% in the event that the Recovery Rate in respect of the relevant Credit Event in respect of the Reference Entity is equal to zero). The product will terminate following the occurrence of an Event Determination Date in respect of the Reference Entity.

2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the credit of the Reference Entity, and the capital protection applies only at maturity and only if the Securities have not been redeemed in accordance with the Credit Terms.

2. Risks related to the Reference Entity:

Investors will be exposed to the credit risk of one or more the Reference Entities (being, in general terms, the risk that a given such entity does not perform its financial obligations when due or becomes insolvent), which exposure may be to the full extent of their investment in such Credit Securities. If a Credit Event occurs, investors may suffer significant losses.

3. Correlated Credit Risks:

In purchasing the Securities, investors assume credit exposure to both the Reference Entity or and the Issuer and the Guarantor. The credit risk to investors may further be increased if the Reference Entity is concentrated in the same industry sector or geographic area as the Issuer or the Guarantor.

4. Actions of the Reference Entities may affect the value of the Credit Securities:

Actions of the Reference Entities (for example, merger or demerger or the repayment or transfer of indebtedness) may adversely affect the value of the Credit Securities. Holders of the Credit Securities Investors should be aware that the Reference Entity to which the value of the Credit Securities is exposed, and the terms of such exposure, may change over the term of the Credit Securities.

5. Suspension of Obligations will suspend payment of principal and interest:

In certain circumstances (for example, where a Credit Event has occurred and the related credit loss has not been determined as at the relevant date for payment, or, if applicable, where a potential Credit Event exists as at the scheduled maturity of the Securities), investors may be adversely affected where payment of the redemption amount on the Securities is deferred for a material period in whole or part without compensation to investors.

6. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Reference Entity, the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Reference Entity, and the correlation risk of the Reference Entity. The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

Data Backstop dell'Evento di Credito	30 ottobre 2025

I Titoli saranno rimborsati alla Data di Liquidazione con un pagamento in contanti per ogni Certificato pari all'Importo Nozionale a condizione che non si sia verificata alcuna Data di Determinazione dell'Evento rispetto all'Entità di Riferimento. Il verificarsi di una Data di Determinazione dell'Evento sarà determinato dal CDDC o da BNP Paribas in qualità di Agente per il Calcolo, a seguito del verificarsi di uno qualsiasi dei seguenti eventi (ciascuno un "Evento di Credito"):

- Fallimento: l'Entità di Riferimento subisce il fallimento o la liquidazione o l'insolvenza o eventi correlati.

Solo Eventi di Credito che si verifichino tra la Data Backstop dell'Evento di Credito e la Data di Fine del Periodo di Osservazione del Credito (o una data successiva in talune circostanze) potranno sortire effetti sul prodotto (Eventi di Credito anteriori o successivi non dovranno essere presi in considerazione). Se si verifica un Evento di Credito rispetto all'Entità di Riferimento, il prodotto sarà rimborsato alla Data di Liquidazione dopo un Evento di Credito (come definito sopra) a seguito della determinazione del Tasso di Riscatto (come descritto sopra). L'investitore subirà una perdita fino al 100% dell'Importo Nozionale per certificato, in quanto riceverà solo il Tasso di Riscatto x Importo Nozionale per certificato come Importo di Rimborso (invece del 100% dell'Importo Nozionale per certificato in assenza di un Evento di Credito). L'eventuale rendimento che un investitore dei Titoli riceve in seguito a tale risoluzione anticipata è probabilmente diverso a seconda degli scenari sopra descritti e può essere inferiore all'importo investito (inclusa un'eventuale riduzione a zero).

Il Garante garantisce incondizionatamente e irrevocabilmente a ciascun Titolare che, se per qualsiasi motivo BNPP B.V. non dovesse corrispondere somme dovute o non dovesse adempiere ad altre obbligazioni in relazione a qualsiasi Titolo alla data specificata per tale pagamento o obbligazione, il Garante, in conformità alle Condizioni, pagherà tale somma nella valuta in cui tale pagamento è dovuto in fondi immediatamente disponibili o, a seconda dei casi, eseguirà o farà adempiere al relativo obbligo nella data dovuta.

Quali sono i principali rischi specifici dei titoli?

Fattori di rischio più significativi specifici dei titoli

Esistono anche rischi relativi ai Titoli, compresi:

1. Rischio relativo alla struttura dei Titoli:

Il rendimento dei Titoli dipende dal credito dell'Entità di Riferimento, e la protezione del capitale si applica solamente alla scadenza e solo se i Titoli non sono stati rimborsati in conformità con i Termini del Credito.

2. Rischi connessi all'Entità di Riferimento:

Gli investitori saranno esposti al rischio di credito di una o più Entità di Riferimento (ovvero, in termini generali, il rischio che una data entità di tale tipo non adempia alle proprie obbligazioni finanziarie alla scadenza o diventi insolvente), esposizione che può essere pari all'intero ammontare del loro investimento in tali Titoli di Credito. Se si verifica un Evento di Credito, gli investitori potranno subire perdite significative.

3. Rischi di credito correlati

Nell'acquistare i Titoli, gli investitori assumono un'esposizione creditizia sia verso l'Entità di Riferimento che verso l'Emittente e il Garante. Il rischio di credito per gli investitori può essere ulteriormente aumentato se l'Entità di Riferimento è concentrata nello stesso settore industriale o nella stessa area geografica dell'Emittente o del Garante.

4. Le azioni delle Entità di Riferimento possono influenzare il valore dei Titoli di Credito

Le azioni delle Entità di Riferimento (ad esempio, la fusione o la scissione o il rimborso o il trasferimento del debito) possono influire negativamente sul valore dei Titoli di Credito. Gli investitori devono essere consapevoli che l'Entità di Riferimento a cui è esposto il valore dei Titoli di Credito, e le condizioni di tale esposizione, possono cambiare nel corso della durata dei Titoli di Credito.

5. La sospensione degli obblighi sospenderà il pagamento del capitale e degli interessi:

In determinate circostanze (ad esempio, quando si è verificato un Evento di Credito e la relativa perdita di credito non è stata determinata alla data rilevante per il pagamento, o, se applicabile, quando un potenziale Evento di Credito esiste alla scadenza prevista dei Titoli), gli investitori possono essere influenzati negativamente qualora il pagamento dell'importo del rimborso sui Titoli sia differito per un periodo rilevante in tutto o in parte senza compensazione agli.

6. Rischi relativi ai mercati di negoziazione dei Titoli:

Il Prezzo di negoziazione dei Titoli può essere influenzato da una serie di fattori tra cui, a titolo esemplificativo ma non esaustivo, il prezzo, il valore o il livello dell'Entità di Riferimento, il tempo rimanente fino alla data di liquidazione/rimborso dei Titoli, la volatilità implicita o realizzata associata all'Entità di Riferimento e il rischio di correlazione dell'Entità di Riferimento. La possibilità che il prezzo di negoziazione del Titolo fluttui (positivamente o negativamente) dipende da una serie di fattori che gli investitori dovranno considerare attentamente prima di acquistare o vendere i Titoli.
